

BRNO INTERMODAL LOGISTICS CENTRE

In the first half of 2008, ČSAD Hodonín a.s. will bring into operation a new Intermodal logistics centre in Brno. This logistics centre will join our existing logistics centres in Prague, Most, Hodonín and Senica (Slovak Republic), creating a total storage area of 43 000 sqm, through which we are able to arrange mainly storage and distribution logistics services in the Czech Republic, Slovakia, Hungary, Slovenia, Poland, Croatia, Austria, and other countries.

Area of the LC

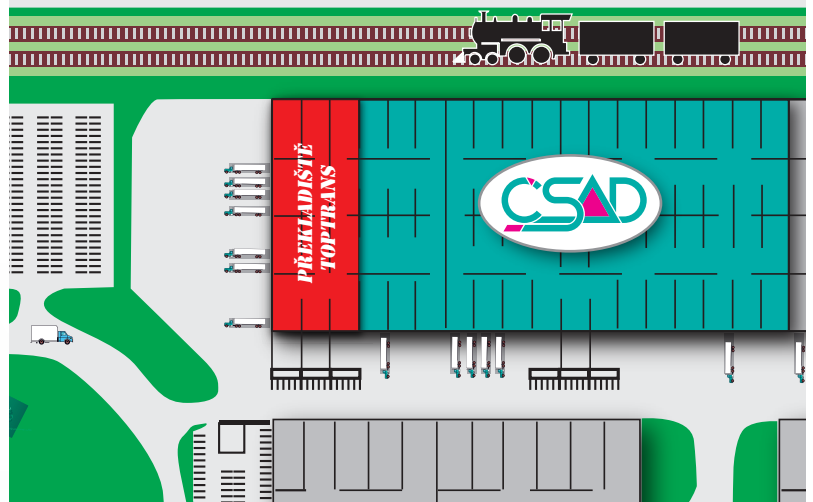

21000 sqm
consisting of 3500 sqm at the Toptrans transit warehouse and 17500 sqm of storage area

Logistics services

- storage
- storage of goods with the purpose of carrying out various logistics operations with added value according to the requirements of the depositor (re-packing, labelling, goods assembly for marketing events, small modifications to goods carried out according to the specifications of depositors)
- co-packing, labelling and many other services according to your requirements and needs
- administration of the warehouse, reports, checks, stocktaking
- continuous tracking of the movement of goods with the option of connection to the customer's software
- identification of goods with the help of EAN codes
- registration of goods flow in the warehouse software, with the option of interconnection with your software
- modern warehouses with temperature management if required
- our own goods distribution system in the Czech Republic and Slovak Republic, which includes the transport of hazardous goods
- railroad spur right next to the warehouse
- customs services, Intrastat
- goods transport
- express transport of single consignments – TOPTRANS
- consultation services in the field of logistics
- protection of goods via a camera system

Range of goods
